Jeff,

I reviewed the Supplemental Soil Sampling proposal submitted by GES, dated 6/8/07. The proposal is in line with the our discussions during our 5/30/07 meeting. The proposal consists of 3 samples for the Tank Field Area and 2 samples for the RR Siding Area. The proposal is approved with one modification. An additional sample should be taken in the RR Siding Area in the vicinity of SB-9. That sample, which was collected during the January 2007 attainment sampling event, was not analyzed.

Please call me if you wish to discuss this matter.
